DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 21, 2009, has been entered.

The amendment filed December 21, 2009 amended claims 1 and 6 and cancelled claims 3 and 7. Currently, claims 1-2, 4-6 and 8 are pending.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-2, 4-6 and 8 are rejected under 35 U.S.C. 102(e) as being anticipated by Tanaka (US Patent No. 6,560,403).

4. Regarding claims 1 and 6, Tanaka discloses a method and apparatus of playing the audio separately from a video, comprising: reading a first pack from among a plurality of packs stored

Art Unit: 2626

in the video disc, wherein the first pack includes a data packet, wherein a first subset of the plurality of packs comprises one or more audio packs, and a second subset of the plurality of packs comprises one or more video packs (Figures 2 and 3; col. 3, lines 44-52; col. 4, lines 21-36; "A-CONT"- col. 9, lines 23-64); determining whether the first pack is an audio pack based on identification information included in the data packet, wherein a first value associated with the identification data indicates that a pack is an audio pack and a second value associated with the identification data indicates that the pack is a video pack (Figures 2-4; col. 3, lines 44-52; col. 4, lines 21-36; col. 9, line 23 to col. 10, line 59); decoding encoded data included in the data packet according to decoding format associated with audio data, in response to determining that the first pack is an audio pack (col. 9, line 23 to col. 12, line 67).

5. Regarding claim 2, Tanaka discloses the identification information is stored in a header of the data packet (Figure 4; col. 10, lines 39-59).

6. Regarding claims 4 and 8, Tanaka discloses the audio encoded data in the data packet is decoded according to MPEG2 format (col. 13, lines 21-23, as the system utilizes discs suitable for a portable type disc playback apparatus).

7. Regarding claim 5, Tanaka discloses searching for a song stored in the video disc using a front margin, a rear margin, a start code, or/and an end code of the video disc (Figure 7; col. 11, line 44 to col. 12, line 13).
